

 I A C A  
THE INTERNATIONAL ASSOCIATION  
OF COMPREHENSIVE AESTHETICS  
-THE AESTHETIC OCCLUSION CONNECTION-

## Join IACA

The International Association of Comprehensive Aesthetics is designed to be a progressive, apolitical, dynamic organization that will always remain at the forefront of change, receptive to all philosophies and ideas. This all-inclusive forum insures that you can determine what is best for your practice. The IACA is a scientific association that remains progressive and fosters an environment that mandates that new rules be written as new technologies are developed.

### Member Benefits

- Annual Scientific Session with Complimentary Workshops
- Networking

# Mission

To elevate aesthetic dentistry around the world through an exchange of doctors' experiences and knowledge for the betterment of humanity. To remain a dynamic dental organization that serves as a catalyst for the fusion of contributions from all disciplines that serve mankind in attaining health and beauty.

*“Since being back from the IACA, my team and I are so excited about what we learned there, being around incredible minds, sharing ideas, meeting old friends and making new ones, the atmosphere was just unbelievable. I’ve been to a lot of dental meetings... IACA is by far the best meeting that anyone can go to.”*  
- Chong Lee, DDS, McLean, Virginia

## Why IACA?

Prior to the inception of the IACA, there were a limited number of organizations that dentists, committed to furthering their education and advancing the profession, could affiliate.

Recognizing this void and left with the impression that existing Dental groups were losing touch with their membership, the IACA was created. A small dedicated group of Dentists (the founding Board members of the IACA), identified the importance and value in keeping abreast of the latest advances in oral health care and providing the very best care for their patients.

The IACA was established not only to provide a vehicle for health care professionals to learn and experience advanced oral health and practice management education. But also, to create an enjoyable environment in which Doctors, family and their team members could interact.

The annual IACA Conference offers a variety of different lectures and hands-on workshops that are presented by world renowned professionals in their respective fields. The IACA is confident that you will feel renewed and more excited about your profession after attending one IACA Annual Conference. Conference attendees develop comprehensive aesthetic treatment skills, network with a wide variety of health care professionals and are introduced to proven practice management techniques, all of which lead to the common goal of building a successful comprehensive aesthetic practice.

*“I am a CE junkie and I must have said ten times that this IACA meeting was probably the best single meeting I have ever attended in my 30 plus years of dentistry. My wife is not into attending meetings like this, and she even liked it, and we are signed up for [the] next meeting, including our team members.”*
